

Installation characteristics:

- Kliux Geo 4k. To the network
- Mini aero-generator with 4 kWh

Installation proposal:

- Self-supply outer lighting
- Leverages existing wind in the marina
- Electricity supply boats

This installation is the first **VAWT installation in a Yacht Club**, and relies on an innovative to be installed system to take advantage of wind power to obtain electricity and serves as reference model for other ports facilities in Galicia, as well as coastal walks.
