

Installation Profile

- KLiux 4k Hybrid System
- 12 photovoltaic modules generating a total of 50 W/1.8 kW
- Electricity controls and battery contained in protective storage unit
- WebBox communications system and Sensor Box weather station

Dolmar is an international leader of innovation in the formulation, manufacturing and distribution of oenological and agri-food products.

Installation Goals

Self-sufficient power generation to provide 100% of the energy needs of Dolmar's laboratories, which generate 13,000 oenological sample analyses each year
